## One-Day Outreach Program

on

# "Trends in Chemistry Education and Opportunities" 20<sup>th</sup> December, 2018

*Organized by*

Department of Chemistry, GITAM Institute of Science, GITAM (Deemed to be University), Rushikonda, Visakhapatnam

*on the occasion of 125<sup>th</sup> Birth Anniversary of Prof. Satyendra Nath Bose*

Chemistry, fundamental discipline, opens doors to a wide range of careers. Nevertheless, Chemistry contains an abundant amount of abstract concepts, which necessitates significant time, effort and commitment from the students. Vast range of jobs and great career opportunities exists, for those who have studied Chemistry at any level, both inside and outside the lab. Chemistry inclusion in the curricula of higher education courses in Science and Technology aims, on the one hand, to develop students' skills necessary for further studies, on the other hand, to endow future professionals with knowledge to analyze and solve multidisciplinary problems in a sustainable way. The jobs of the future will be created in Chemistry to solve global challenges such as human health, energy and the environment.

This outreach program aims at exposing the fascinating side of Chemistry to students through experts from Industry, National research lab and those involved with policy designing. This gives an opportunity to burst the apprehensions of students who are unsure about pursuing Chemistry as career.
