

INSTITUTE SEMINAR

Friday, 6 June 2014

4:00 p.m.

Fermion

Speaker:

Dr. Dibyajyoti Banerjee

Assistant Professor

Department of Experimental Medicine and Biotechnology

Postgraduate Institute of Medical Education and Research, Chandigarh

Title:

Antioxidants: Myth and Reality

Abstract:

Oxidative stress is associated with many diseases and antioxidants are widely believed to ameliorate such stress. However oxidants are also beneficial for human health in certain situations and antioxidants are known to cause harm to the human body. This paradox will be addressed from mechanistic point of view highlighting recent research.
